“Journey of the Salmon” is a free interactive presentation that uses the life cycle of a Chinook salmon in the Sacramento River to teach students about the CA Science Concept Standards of life cycles, habitat, and adaptations.

CA State Science Standards: K-7 Life Science
National Science Standards: K-8 Standards A, C, and F

By using an incredible 6-foot salmon costume, wonderful slides, fun stories and hilarious audience participation, this program has informed, inspired, and captivated audiences of all ages. The presentation comes with activity packets for each grade level, giving teachers a fun and easy way to expand on the presentation.

“Journey of the Salmon” is adaptable for students from kindergarten through 8th grade, and works extremely well as a full school assembly or in individual classrooms.

What people are saying about “Journey of the Salmon”

“I have rarely seen a guest presentation so on target for my students ~ so informative, energetic, creative and influential” Merry Byles-Daly, 4th grade teacher at Grass Valley Charter School

“Outstanding, inspired...slides and skit were excellent!” Stephen Meyer, National Marine Fisheries Service

“Great presenter with excellent management and pacing” Lenka Vodicka, 2nd grade teacher at Nevada City School of the Arts

“Outstanding presentation – good humor...and conveyed a good deal of information” Steve Tassone, an 8th grade teacher at Mt. St. Mary’s

“A week later, my son is still telling his friends all about salmon!” Denise Hynes, Pack 21 Boy Scout leader
